For larger jobs, with fine finish quality, the 1-liter cup might cause fatigue after hours of spraying. ProComp™ can make your work a lot lighter and more comfortable as this extra external compressor makes it possible to separate the material from the gun. The powerful compressor attaches to any HVLV TurboForce™ sprayer: it takes only a few seconds without any tools. No controls (kits available for manual settings)

	17E254	INJECTION KIT, RIGID AND VALVE	€ 166,00

OPTIMIZE FLOW AND PRESSURE
When extending your hose length (over 15 m), it is always recommended to increase your hose diameter. Larger ID reduces friction.

	224398	ADAPTER 1/8" TO 7/8" FOR HD EXTENSIONS	€ 102,00

OPTIMIZE FINISH QUALITY
In a standard airless system, the paint passes through 3 filters before atomisation:
inlet screen, pump filter and the gun filter.
The first filter is the biggest, the last one, the smallest.

2019. Official list prices on CIS only. All prices are subject to change without notice.

OPTIMIZE PRODUCTIVITY – feeds the pump using gravity.
Benefits when using thick materials such as plasters and fillers.
Large capacity enables working for longer periods of time before refilling.

TIPS

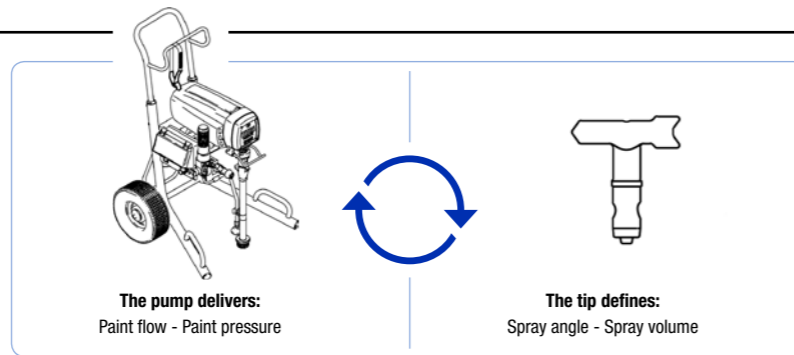

Sorted per type of tip,
including all available sizes

1. UNDERSTANDING TIPS

The right tip:

- Increases your performance
- Improves the quality of your work
- Keeps your costs under control

2. WHAT DOES A TIP TELL YOU? CRACKING THE CODE

The **colour** tells you which application you can use the tip for

- guarantees the best possible finish under lowest pressure for fine finish and wall paints
- for painting walls, suitable for paint spraying in general
- for thin plastering and less fluid materials
- for marking roads

The **first number** indicates the fan width of the tip

The first number stands for the width of the spray distribution (the fan width). It matches the angle you are spraying at. If the number is 5, then you are spraying at an angle of 50°. Multiply that number by 5 and you have a fan width if you hold the pistol 30 cm from the surface.

$$5 \times 5 = 25 \text{ fan width}$$

The **last two numbers** indicate the spray orifice of the tip

The last two numbers of the tip show the size of the spray orifice, indicated in one thousandths of an inch. The higher the number, the greater the flow with which you can spray. For example, a '517' tip enables a greater flow than a '515' tip.

'17' matches an orifice of 0.017 inch or 0.43 mm.

3. ADJUSTING TO THE RIGHT TIP

By experimenting with various tips, you become experienced and can easily decide which tip is the best one for your application.

TOO MUCH PAINT?

0.017" = 1.2 litres/minute

50° WALL 25 cm

1) Use a smaller tip orifice
15 instead of 17

2) Increase the spray angle
7 instead of 5

NOT ENOUGH PAINT?

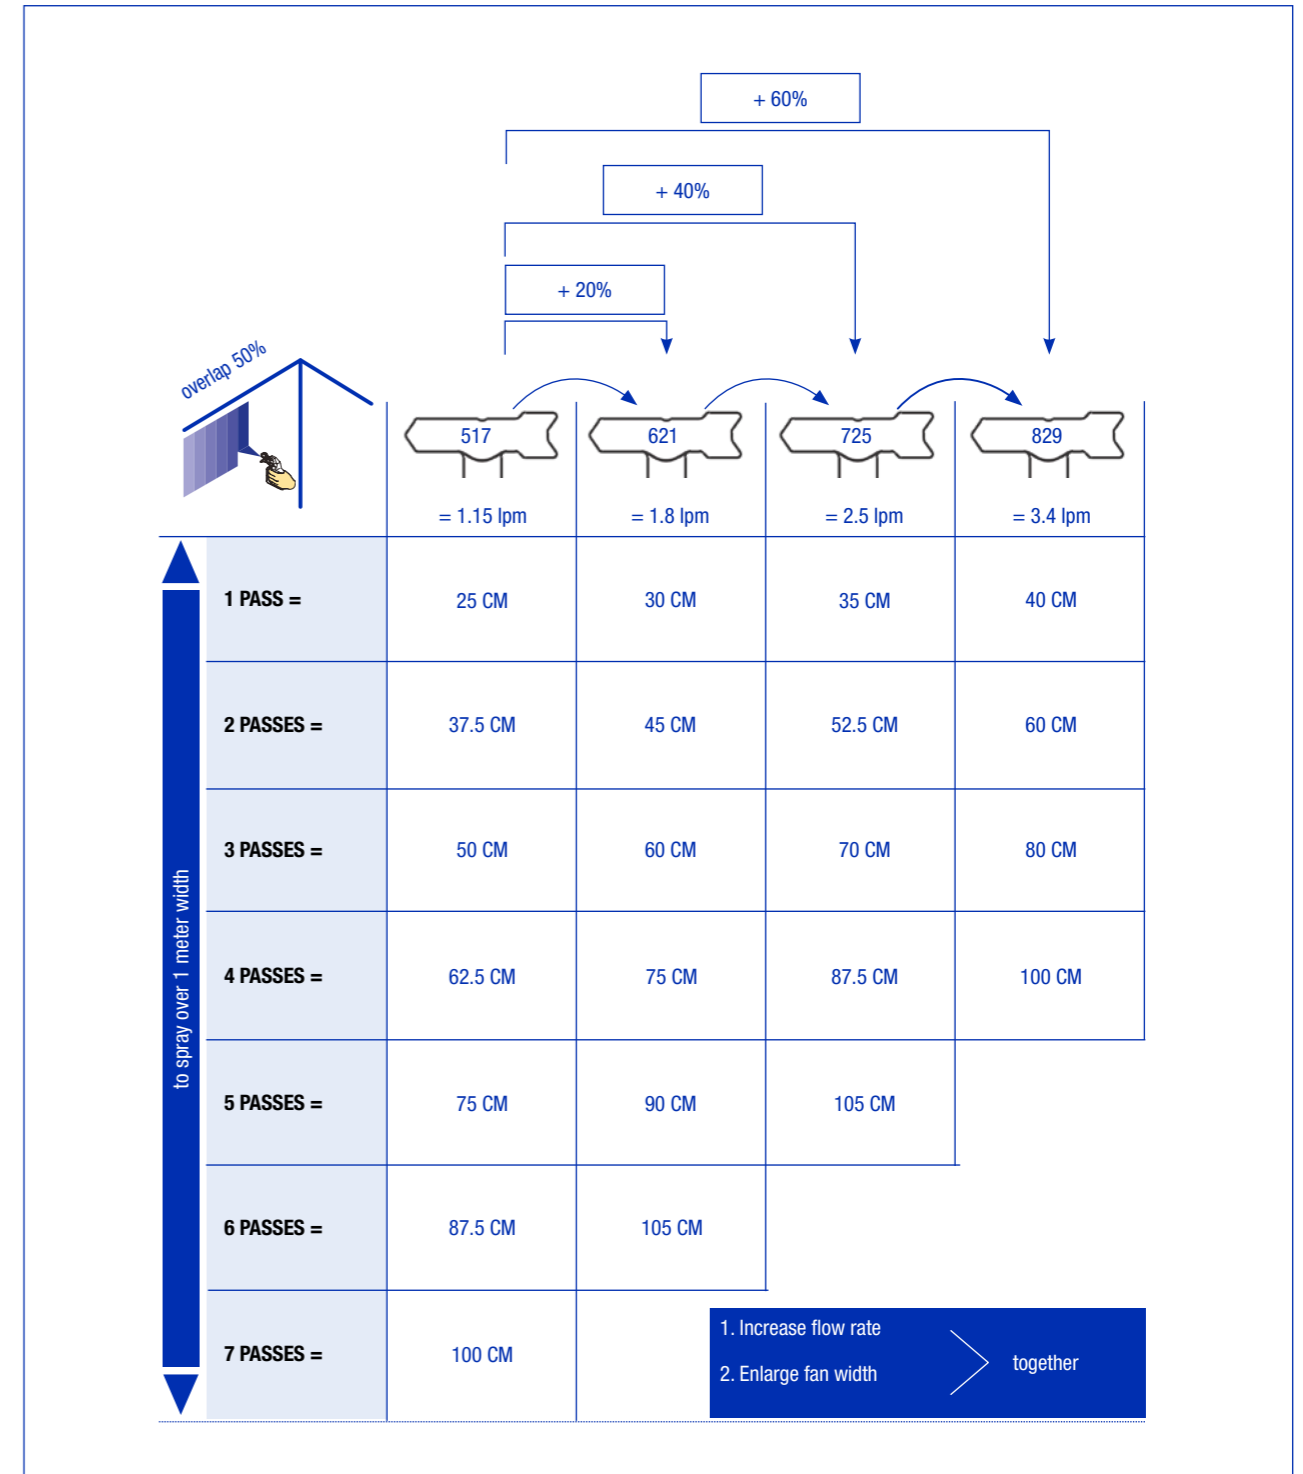

0.017" = 1.17 litres/minute

50° WALL 25 cm

1) Use a larger tip orifice
19 instead of 17

2) Decrease the spray angle
3 instead of 5

4. INCREASING PRODUCTIVITY WITH TIPS

5. A TIP ON TIPS

WHAT IS TIP WEAR?

1

FAN WIDTH DECREASES
= more passes necessary
= more labour

+

2

ORIFICE SIZE INCREASES
= more paint comes out
= more material cost

=

TWICE THE LABOUR!
+ 30% More paint for the same surface!

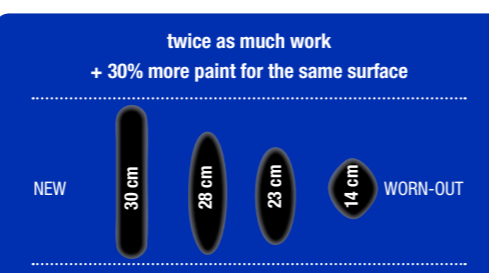

WHAT HAPPENS WHEN A TIP GETS WORN OUT?

Piston work pressure and abrasive material are the two main causes of worn-out tips.

The fan width decreases:
> More spray movements are necessary
= more work

Greater tip orifice:
> More paint comes out of the piston
= more costs for materials

twice as much work
+ 30% more paint for the same surface

BREAKTHROUGH LOW PRESSURE SMARTTIP™ TECHNOLOGY, ENGINEERED TO DELIVER THE INDUSTRY'S BEST FINISH!

Featuring the patented Graco RAC® X Tip with **SMARTTIP™ TECHNOLOGY** and exclusive internal tip geometry which delivers the industry's best finish at the lowest airless spray pressure!

BREAKTHROUGH **ATOMIZATION**

- Ability to spray at low pressures without tails
- Better finish at all pressures – works well with hard to atomize Low VOC materials

BREAKTHROUGH **RELIABILITY**

- Longer tip life when used at low pressure
- Less stress and strain on the sprayer

BREAKTHROUGH **VERSATILITY**

- Longer hose lengths
- Smaller diameter hose

SMARTTIP™ TECHNOLOGY is designed to work with Graco's exclusive **SMARTCONTROL™ PRESSURE MANAGEMENT SYSTEM** to deliver a superior spray fan without pressure fluctuations – at all spraying pressures!

LOW PRESSURE TECHNOLOGY EXTENDED TO LARGER TIP SIZES!

ABOUT GRACO

Founded in 1926, Graco is a world leader in fluid handling systems and components. Graco products move, measure, control, dispense and apply a wide range of fluids and viscous materials used in vehicle lubrication, commercial and industrial settings.

The company's success is based on its unwavering commitment to technical excellence, world-class manufacturing and unparalleled customer service. Working closely with qualified distributors, Graco offers systems, products and technology that set the quality standard in a wide range of fluid handling solutions. Graco provides equipment for spray finishing, protective coating, paint circulation, lubrication, and dispensing sealants and adhesives, along with power application equipment for the contractor industry. Graco's ongoing investment in fluid management and control will continue to provide innovative solutions to a diverse global market.
