CeboGliss

	packing		Euro for packing VAT excluded	minimun multiple quantity
Powder additive based on glitters. Argento	75 gr		12,70	6
	30 gr		6,00	12
Oro, Blu, Rame, Verde, Mix	75 gr		14,50	6
	30 gr		6,80	12

Dosing:	5 lt packing	2x75 gr
	2,5 lt packing	1x75 gr
	1 lt packing	1x30 gr

CeboGliss can be used with all the acrylic Cebos finishes applied **by brush**.

ATTENTION: add **CeboGliss** to the product shortly before application. Use the mixed product within maximum 6 days.

CeboMagic

	packing		Euro for packing VAT excluded	minimun multiple quantity
Liquid additive based on multicolour micro-glitters.	250 ml		18,50	3
	100 ml		9,00	4

Dosing:	5 lt packing	2x250 ml
	2,5 lt packing	1x250 ml
	1 lt packing	1x100 ml

CeboMagic can be used with all the acrylic Cebos finishes applied **by brush**.

ATTENTION: add **CeboMagic** to the product shortly before application. Use the mixed product within maximum 6 days.

CeboKiss

	packing		Euro for packing VAT excluded	minimun multiple quantity
Water based, transparent protection, for interiors and exteriors, based on special multicolour glitter. estimated coverage: 10 m2/litre	2,5 lt		83,40	2
	1 lt		36,70	3

Acrylic washable transparent finish, for interiors and exteriors based on multicolour flakes. CeboKiss is ready to use, it can be applied in one layer with a paintbrush over all the finishes of the acrylic Cebos Color line; for application on dark colors it is advisable to dilute the product with water (15-20%).

CeboMika

	packing		Euro for packing VAT excluded	minimun multiple quantity
Special flakes additive available in silver (Argento) and gold (Oro) shades.	100 ml		22,00	3
	25 ml		7,40	4

Dosing:	20 kg packing	1x100 ml
	5 kg packing	1x25 ml

Special flakes additive based on natural mica which, added to CeboArt Pozzolano or CeboArt CalceFine, creates elegant points of light in the finish. CeboMika is available in Silver and Gold shades in packages of 25 ml and 100 ml.

CeboFix M

	packing		Euro for packing VAT excluded	minimun multiple quantity
Transparent fixative based on an acrylic micro-emulsion. estimated coverage: 10 m2/litre of diluted product	5 lt		43,00	2
	1 lt		12,25	3

Transparent fixative for interior and exterior walls based on acrylic microemulsion, suitable for application on gypsum, lime or civil substrates. Used on new plasters, new masonry, dusty or absorbent walls, consolidates the surface and regulates the absorption of the substrate facilitating the application of the finish coatings. Apply CeboFix M in one layer, by paintbrush, diluted 1:1 with water.

CeboFix Primo

	packing		Euro for packing VAT excluded	minimun multiple quantity
White, water based, acrylic fixative. estimated coverage: 10 m2/litre	10 lt		105,00	
	5 lt		57,70	2
	1 lt		15,40	3

White pigmented fixative, based on special acrylic resins. Suitable for application on gypsum, plasterboard or surfaces already painted. The use of CeboFix Primo is recommended for uniforming surfaces with differences in color and absorption. Excellent for uniforming plasterboard. In order to facilitate the application and coverage of the following finishes, it can be used white or colored in the same finishing tint. Apply CeboFix Primo in one coat, by paintbrush or roller, diluted with 20-30% of water.

CeboFix R

	packing		Euro for packing VAT excluded	minimun multiple quantity
White, quartz based acrylic primer for interiors and exteriors. estimated coverage: 10-12 m2/litre	12 lt	NEW	91,00	
	5 lt		48,00	2
	2,5 lt		28,00	2
	1 lt		14,20	3
* CeboFix R Lt. 10: out of stock				

White, water based, acrylic primer with quartz powder. Suitable for substrate preparation for interiors and exteriors. CeboFix R has a white appearance and a slightly rough texture which optimizes the application, the coverage and the uniformity of the following layers of acrylic and lime-based finishes. Due to its good permeability to water vapour it is especially recommended for the application of lime based products of CeboArt Line. Apply CeboFix R by paintbrush or roller, in one layer, diluted with 20-30% of water.

CeboFix Extra

	packing		Euro for packing VAT excluded	minimun multiple quantity
Water-based pigmented primer, which acts as anchoring bridge between difficult surfaces and the various finishes. estimated coverage: 8-10 m2/litre	2,5 lt		51,30	2
	1 lt		23,70	3

Water-based pigmented primer, based on special modified synthetic resins, for interior use. It can be used on wood, metal, plastic and ceramic surfaces (properly prepared) to allow the subsequent application of Cebos finishes. Apply the product, diluted with 5-10% of water, by roller or paintbrush.

CeboFix K

	packing		Euro for packing VAT excluded	minimun multiple quantity
Transparent water based primer made with a styrene acrylic resin. estimated coverage: 15-16 m2/litre of 1:1 diluted product	1 lt		19,00	3

Transparent primer based on a styrene acrylic resin with water, for interiors. Suitable for adjusting the absorption of the support before the CeboSkil application, transparent water protective finish. Apply the product, upon dilution 1: 1 with water, in a roller or brush hand.

FondoPlus

	packing		Euro for packing VAT excluded	minimum multiple quantity
White acrylic based coat with a smooth texture. estimated coverage: 8-10 m ² /litre	10 lt		116,80	
	5 lt		64,00	2
	2,5 lt		34,70	2
	1 lt		16,70	3

Water based acrylic basecoat with high coverage and brilliant white. Apply the product with a short pile roller, in one or two coats until the surface is entirely covered. After the complete drying of FondoPlus proceed with the application of CeboStyle Antico, CeboTime, CeboStone, CeboFree, CeboSpark, CeboStyle, Cebolron Cromo.

CeboSi Fondo

	packing		Euro for packing VAT excluded	minimum multiple quantity
White acrylic base coat, with a slightly rough texture. estimated coverage: 10 m ² /litre	5 lt		61,00	2
	1 lt		16,00	3

Water based acrylic basecoat with a slightly rough texture. Apply the product with a short pile roller, in one or two coats until the surface is entirely covered. After the complete drying of CeboSi Fondo proceed with the application of CeboSi Decoro, CeboSi Setoso, CeboSi Riflessi and CeboVel.

CeboStone

	packing		Euro for packing VAT excluded	minimum multiple quantity
White, acrylic based finish, with sandy effect, for interiors and exteriors. estimated coverage: 7-8 m ² /litre	10 lt		140,50	
	5 lt		76,60	2
	3lt		47,90	2
	1 lt		19,50	3

Acrylic water based basecoat and finish, with a particular surface structure that creates light sandy reliefs. Apply one coat of CeboStone with a medium size paintbrush, working with crossed brush-strokes to obtain alternating smooth and rough areas. Once CeboStone has completely dried, proceed with the application of CeboStyle, Cebolron Cromo, CeboSi Universal AS.

CeboQuarz

	packing		Euro for packing VAT excluded	minimum multiple quantity
Quartz acrylic paint for interiors and exteriors, with an embossed and matt appearance. estimated coverage: 7-8 m ² /litre in two coats	10 lt		120,70	
	5 lt		66,30	2
	1 lt		17,40	3

Quartz acrylic paint with embossed appearance. Apply in one or two coats with a shorthair roller until the complete surface coverage. Once CeboQuarz is completely dried, proceed with CeboSi Universal AS application.

Textured basecoats

Ceboldea

	packing		Euro for packing VAT excluded	minimun multiple quantity
Acrylic finish for interiors designed to create relief effects. estimated coverage: 2-3 m2/litre	10 lt		124,40	
	5 lt		68,10	2
	1 lt		17,50	3

Water based acrylic basecoat for interiors. Due to its particular formulation can be applied as a decorative high tickness basecoat, allowing the creation of slightly materic effects. Once Ceboldea has completely dried, proceed with the application of diluted CeboStyle Antico, Cebolron, CeboSi Riflessi, CeboTime.

CeboStrong

	packing		Euro for packing VAT excluded	minimun multiple quantity
Water based acrylic coating designed to create special effects in relief. estimated coverage: 1,5 m2/litre	10 lt		97,40	
	5 lt		53,80	2
	1 lt		14,60	3

Water based acrylic coating for interiors. It has an excellent filling properties and can be applied in medium/high tickness layers to create special materic relief effects. Once CeboStrong has completely dried, proceed with the application of CeboStyle Antico, Cebolron Cromo, CeboSi Universal.

CeboSil

	packing		Euro for packing VAT excluded	minimun multiple quantity
Breathable and water-repellent acrylic-siloxane protective finish with a matt and velve aspect. estimate coverage: 10 m2/litre of diluted product	2,5 lt		46,40	2
	1 lt		21,70	3

Transparent and matt finish for interiors and exteriors based on water and on acrylic-siloxane resin. It has to be diluted 1:1 with water and applied by brush from down to the top to avoid dripping.

CeboTech

	packing		Euro for packing VAT excluded	minimun multiple quantity
Acrylic water-based protective finish for interiors and exteriors. estimated coverage: 10 m2/litre of diluted product	2,5 lt		45,30	2
	1 lt		21,30	3

Water-based, acrylic, colourless protective coating. For interiors and exteriors. It can be used diluted 1:1 with water to protect and give a satin look to all acrylic finishes if used. Diluted 1:4 with water (colourless or colored) it completes and protects CeboArt lime based finishes, without compromising their natural breathability.

CeboWax

	packing		Euro for packing VAT excluded	minimun multiple quantity
Transparent water and beeswax based finish, breathable and water repellent. estimated coverage: 12-14 m2/litre	2,5 lt		41,30	2
	1 lt		19,60	3

Protective water and beewax based finish for interiors, breathable and water repellent. It is used colored and diluted 30% with water to create glazes on CeboArt Model or transparent and diluted 1:1 with water to protect and polish CeboMarmo, ceboArt Stucco and CeboArt Marmorino.

CeboFlow

	packing		Euro for packing VAT excluded	minimum multiple quantity
Transparent protective based on fluoridated polymers for interiors and exteriors. Estimated coverage: 10 m2/litre	2,5 lt		35,50	2
	1 lt		17,00	3

Transparent protective based on water and fluoridated polymers. Suitable for interior and exterior applications, it is particularly recommended on exterior thanks to its high resistance to rainwater and air pollution. CeboFlow creates an invisible and water repellent barrier without modifying the aesthetic aspect and the water vapour permeability of the surfaces. Ready to use, apply it in a layer with the brush up to the rejection, from bottom to the top to avoid dripping.

CeboVitra Più

	packing		Euro for packing VAT excluded	minimum multiple quantity
Polyacrilic transparent protective finish for interior and exterior use. estimated coverage: 12-14 m2/litre per hand	2,5 lt		110,50	2
	0,8 lt		39,60	3

Polyacrilic water based protective finish, transparent, glossy. Suitable for interior and exterior once; treated surfaces are extremely washable and high scratch resistant. Suitable for protecting surfaces subject to frequent cleaning operations. Ready to use, apply CeboVitra Più in two layers with a short pile roller.

CeboVitra Matt

	packing		Euro for packing VAT excluded	minimum multiple quantity
Polyacrilic transparent protective finish, for interiors, matt. estimated coverage: 12-14 m2/litre per hand	2,5 lt		110,50	2
	0,8 lt		39,60	3

Polyacrilic water based protective finish, transparent, full matt. Only for interiors. The treated surfaces are profoundly matt, soft to the touch, extremely washable and high scratch resistant. Ready to use, apply CeboVitra Matt, in two coats with a short pile roller.

CeboSkil

Lucido - Satinato - Opaco

See the following page for prices, characteristics, application and certification.

Active Line, homogeneous and decorative wall finishes enriched with silver ions

All the finishes in the **ACTIVE** version, thanks to the properties of silver ions, combine the technical and aesthetic qualities of the products with a long-lasting bactericidal and bacteriostatic function.

ACTIVE PROTECTION AGAINST MOLD AND BACTERIA.

It eliminates over 99% of the bacteria present on the treated surfaces.

(tests carried out according to ISO 22196: 2011)

Surface treatment

Ensure that the substrates are perfectly clean, dry and uniform. In case of recently repaired walls, highly absorbent or chalky substrates, carefully clean the surface and apply a coat of fixative **CeboFix M**, by paintbrush, diluted 1:1 with water.

FIXATIVE

CeboFix M

	packing		Euro for packing VAT excluded	minimum multiple quantity

	2,4 lt		33,80	2
	0,8 lt		14,45	3

CeboLife Active

Matt, antibacterial wall finish, enriched with silver ions, with high washability and coverage, for interiors. Estimated coverage: 7-8 mq/litre in two coats.	12 lt		122,00	
	4 lt		49,00	2
	0,8 lt		14,60	3

Reference Colour Card: CeboTop Lak Active, CeboLife Active, I COORDINATI

CeboKing is a water and polyacrilic resin based finish for multiple surfaces, for interiors and exteriors; it can be applied directly on different surfaces appropriately prepared such as: metal, plastic, wood and ceramic. The mechanical and washing resistance are very high and it has an excellent hiding power and point of white.

CeboSkil is a protective transparent based on water and polyacrilic resin for interiors and exteriors, available in the versions: **Glossy (Lucido) - Satin (Satinato) - Matt (Opaco)**. Catalysed with CeboCat, it considerably increases its washability, mechanical and stain resistance. **It is necessary to catalyze CeboSkil with CeboCat when used on CeboSynt and CeboSuite resins and on CeboKing and for all the environments that require HACCP Certification.**

Calce d'Autore

*From the charm of the past to the taste for contemporary design:
The essence of Lime interpreted in a combination of Classic and Modern style*

Cebos Color offers a complete range of decorative finishes based on natural lime, with characteristics of high breathability, anti-condensation action, resistance to mold and bacteria, stability and durability over time.

From the timeless Stucco to the classic **Marmorino**, from the traditional **Pittura** to the innovative **Natura** with strong anti-condensation properties, from the different interpretations of **Cement** and the ancient stones of **Pozzolano** to the material and contemporary aspect of the solutions achievable with **Model**, from the elegant perfectly matt finishes of **CalceFine** to the refined light points of **CeboMika**.

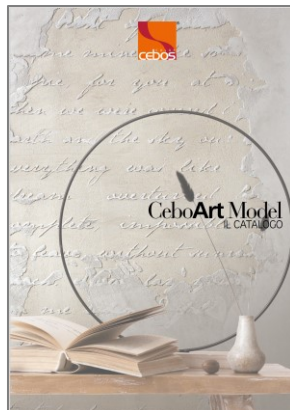

The whole **CeboArt Line** is formulated with over **95% of natural origin raw materials** such as long-seasoned lime putty, mineral components and waxes. Since these are natural products, it is important, before proceeding with the application, check the conditions of the supports, which must be well seasoned, perfectly clean and dry; any irregularities in the substrate must be leveled out with suitable fillers or smoothers, to prevent that differences in absorption or in the structure of the support may give rise to variations in color or differences in effect.

INDICATIONS of CORRECT APPLICATION:

Before proceeding with the application of the breathable fixative **CeboFix R**, make sure that the substrate is completely dry, especially in the presence of recent grouting or smoothing.

It is important to wait for the total drying of all the steps of the application cycle, to allow the complete evaporation of the water contained in the applied products; otherwise it could occur the formation of odor and, if it is not possible to adequately ventilate the room, the phenomenon could continue in the medium term.

All the products of the CeboArt line applied on CeboFix R maintain unaltered the characteristics of high breathability and permeability to water vapor typical of lime products.

Determination of resistance to molds according to UNI 15457: 2014

Evaluation of fungal growth 21 days after spore grafting:

- 0 = no mycelium on the specimen surface.
- 1 = growth up to 10% of the specimen surface.
- 2 = growth over 10% and up to 30% of the specimen surface.
- 3 = growth over 30% and up to 50% of the specimen surface.
- 4 = growth over 50% and up to 100% of the specimen surface

Control parameters:

<4 = suitable.

PIECES PER PALLET

33 pails of 20 kg or 15 lt - 33 pails of 10 kg or 10 lt

CONDITIONS AND DURATION OF STORAGE

All our products have a guaranteed duration between:

- 12 months for lime-based products, flake-based products and dyes.
- 24 months for all the others, as long as they are stored in suitable environments and at temperatures between + 5 ° C and + 35 ° C.

ORDERS AND DELIVERIES

The goods travel on behalf and at the risk of the buyer even if they are delivered carriage paid. The delivery terms are indicative and subordinate to all those circumstances that may preclude, hinder and delay supplies and shipping by the seller. Any delays in delivery must not give rise to any claim for damages. Furthermore, the customer withdraws from the contract for the same reason. If the delivered goods do not correspond to the agreed in quality, or are defective, the seller's liability does not go beyond replacing the goods, thus excluding any compensation for damages.

For each pallet involved in the delivery will be charged € 16,00.

PRICES

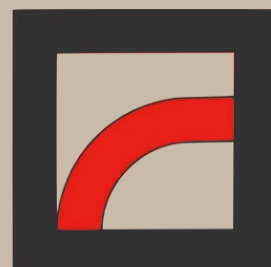

Our products are sold at the current price list: any changes could occur at any time, even without notice. Quantities and prices for orders of products and special colors will be agreed from time to time. Prices are intended for goods delivered ex-works from our plant.

COMPLAINTS

The state of the packages and the number of them must be checked at the time of receipt: any failures, shortages or anomalies must be immediately reported to the carrier, in writing on the delivery note, by having it countersigned by the carrier himself.

EXCLUSIVE COMPETENCE

All disputes will be addressed at the court of the city of Bergamo (Italy).
